OLIMPIA SRL

OUR COMMITMENT FOR ENVIRONMENTAL PROTECTION

Olimpia continually strengthen its commitment in the field of the environment in compliance with international standards.

In the framework of its mission, Olimpia commits to implement the culture of environmental sustainability, to build awareness and grow knowledge within the Olimpia system, as to say between all the individuals who have a legitimate interest and/or are influenced by its activities: employees, shareholders, customers, suppliers, subcontractors, commercial and financial partners, local communities and institutions.

This commitment is achieved through consistent and practical actions taken in the management of the day-to-day business.

Compliance with the Law

We observe relevant national and international legislation on environmental matters, and commitments undertaken by the company with interested parties and reference standards;

Our suppliers are encouraged and invited to respect environmental regulations, to adopt relevant standards of environmental management and to involve the whole supply chain to operate in full respect of the principles and measures adopted by the Company.

We apply a precautionary approach towards environmental challenges.

In all those cases where there is a lack of scientific certainty we act with thorough attention in order to preserve the environment and minimize any potential impact upon it.

Acquaintance to reduce environmental impacts

We investigate direct and indirect effects generated throughout the life cycle of our products and we assess social and economic influences of our environmental impacts.

OLIMPIA SRL

Measures to reduce environmental impacts and conservation of flora and fauna.

We aspire to adopt solutions which optimize energy consumption, emissions of substances harmful for the environment and people, water consumption and waste production of our offices, warehouse and manufacturing plants.

Our structures design follow the standard criteria oriented to energy efficiency and reduction of the environmental impact.

We prefer to use sustainable packaging by reducing the amount, the reuse and use of raw materials from sustainable sources.

We promote ethic treatment of animals throughout all our supply chain and eschew any cruelty towards them. We reject animal experimentation and refuse to collaborate with suppliers or subcontractors that act with cruelty and/or endanger the life and/or wellbeing of animals.

Our research and development are oriented towards the reduction of the environmental impact in the production/use/end of our items or towards the creation of new eco-friendly products.

In collaboration with our supply chain, we promote the use of materials from sustainable sources whose production/extraction/processing has a low impact on biodiversity, ecosystems, climate change and soil conservation.

We look for solutions apt to eliminate chemicals harmful to humans and to the environment from our products and production processes.

Involvement and awareness of our supply chain

We involve our supply chain, from raw materials to subcontractors and service suppliers, in a growth path pertaining environmental awareness through a sharing and respect of the sustainability principles and the adoptions of actions of continuous improvement.

We listen and communicate with our supply chain in an open and constructive manner in order to identify common projects and objectives on environmental protection.

The compliance with these commitments is part of a system oriented to the ethics of business, the respect of human rights and the protection of the environment.
